

eBook Instructions

The Livermore Public Library provides access to more than 10,000 eBooks through NetLibrary and Safari Tech Books Online.

The **NetLibrary** collection includes a wide variety of general interest titles as well as Cliffs Notes, Nolo self-help law books, computer, career, health and travel books. NetLibrary provides access to approximately 8,500 eBooks. Only a small percentage of the NetLibrary eBooks can be downloaded (checked out) for offline viewing. You must have a Livermore library card in order to access NetLibrary from home. In addition, you'll need to create a NetLibrary account if you want to download (check out) a NetLibrary eBook or use features such as Notes or Favorites.

Safari Tech is a database of up-to-the-minute books for programmers and IT professionals. Safari Tech eBooks are not downloadable. They can only be viewed online. You must have a Livermore library card in order to access Safari Tech eBooks from home.

There is also a set of 20 eBooks on the **California missions** published by Follette Books. You do not need to have a library card in order to access these books from home. They can be downloaded.

There are two ways to access the NetLibrary and Safari eBook collections:

Option 1 – Access eBooks via the eBooks page:

1. Go to the library homepage at www.livermore.lib.ca.us.
2. Click on **e-Resources** (in the upper right corner).
3. Scroll down until you see E-Books.
4. Select *NetLibrary* or *Safari Tech Books*.
5. Enter your last name and library barcode when prompted (if outside the library)
6. You can now search for a particular title, author, or subject or for keywords within a particular eBook or within the entire collection of eBooks.

Option 1 is the method to use when you want to search the actual text of an entire eBook *collection*.

Option 2 - Access e-books via the Livermore Public Library Online Catalog:

1. Go to the library homepage at www.livermore.lib.ca.us and do a search.
2. Click on the **Modify Search** button (at the top of the page).
3. Select the material type *E-Books* from the menu and click on **Go**.
4. Select a book which interests you by clicking on the title then click on the link **Connect to this resource online**. If you're outside the library you'll need to enter your last name and library barcode when prompted.

Option 2 is the preferred method when you're searching for a particular title or author.

Searching for an eBook from *within* NetLibrary

Start your search in one of two places:

Basic Search lets you quickly perform a search by entering terms and selecting a single search field. You may choose to search for your terms in the *Keyword, Title, Author, Subject, or Full Text* fields.

When searching in the *Title, Author, or Subject* fields you don't need to put your search terms in any particular order. For example, the Author search *mark twain* would yield the same results as *Twain, Mark*.

Searching by *Keyword* will search for your terms in the *Title, Author, Subject, Publisher and ISBN* fields. When searching by keyword, enter a single term (example: programming) or multiple terms that can be found in the same or different fields (example: *pride prejudice or midsummer Shakespeare*).

Selecting the *Full Text* option looks for your term or terms within the full text of all the NetLibrary eBooks. You can search for a single or multiple terms or search by phrase by enclosing your search string within quotation marks.

Advanced Search lets you construct more complicated searches using multiple fields and Boolean operators. You can also limit your search to publication year, publisher, language, or format.

<p>Note: You do not have to enter any search terms in Advanced Search in order to get useful results. For example, for a list of downloadable eBooks, select the limiter <i>Downloadable eBooks</i> and click on <i>Search</i>. For a list of eBooks in French, select the language <i>French</i> and click on <i>Search</i>.</p>
--

Once you have found an eBook you are interested in, you can view the full text online. You will not need any special software to view eBooks online. There is no time limit or loan period for viewing the eBooks online; however, if your computer keyboard is inactive for more than 15 minutes, an automatic time-out occurs.

Some of the NetLibrary eBooks (about 20%) are downloadable. To determine if an eBook is downloadable, click on **Show Details** from within a title list.

10.  **Berenstain Bears Go to School**
A Random House Picturebook
by Berenstain, Stan.; Berenstain, Jan
Publication: New York: picturebooks, 2005.
The next day, Mama and Sister packed a lunch and took the long Bear Country School. Handy Bear Gus was up on a ladder, fixing the Sister Bear. She starts kindergarten next

If you want to be able to view the eBook offline or to print entire chapters or sections, you will need to download. In order to download (check out) NetLibrary eBooks, you must create a NetLibrary account. You do not need to come into the library in order to create an account, but you will need a valid Livermore library card.

How to create an account

1. Connect to the NetLibrary website (see Option 1 above).
2. In top right corner, select "Create a Free Account".
3. Enter the requested information and follow the onscreen instructions to complete your registration.

You must have Adobe Reader 6.0 or higher in order to download NetLibrary eBooks. Go to <http://www.adobe.com/products/acrobat/readstep2.html> to download Adobe for free. You will need to activate Adobe DRM (Digital Rights Management) on your computer and PDA (if you're using one) before downloading your first eBook. Go to <https://aractivate.adobe.com/eden/EdenUI.asp?lc=1033> and follow the simple instructions.

How to check out and download a NetLibrary eBook

1. Search for the eBook you want to download.
2. Click on the *Show Details* link for the title.
3. Click on *Check Out & Download* this eBook.
4. Click on *Download this eContent* to begin downloading.
5. Adobe Reader will open and receive the downloaded document.

Note: Do NOT download eBooks to a public computer in the library.

Only one person can view a NetLibrary eBook at a time (except "public domain" titles- see Note below). If all copies of an eBook are in use, you have the option of placing a request for email notification when the title becomes available. The following message will appear when an eBook is checked out or in use. If you wish to be notified when the title comes available, click on *Request to be notified* and enter your e-mail address.

 We're sorry, your library's copies of this eContent are currently in use. Either try again later or use one of the options below.

- [View the Table of Contents of this title now](#)
- [Request to be notified when this title becomes available](#)

An arrow points from the text above to the second link, and a red circle highlights the link text.

Note: Not all titles available through NetLibrary are included in the Livermore Public Library's online catalog. NetLibrary also provides access to over 3,400 freely available "public domain" titles. For access to these titles, you must go directly to NetLibrary and search by author, title, etc. If you find the title, you can browse it online in NetLibrary. Because an unlimited number of patrons can view a "public domain" eBook simultaneously, NetLibrary does not allow the option of downloading. If you want to be able to download the book for offline viewing or to print entire chapters, go to the source site. There maybe be download and print options there. To find the source site, click on the *eContent Details* tab on the left sidebar.

The checkout period for NetLibrary books is 7 days.

When you have finished your eBook

Returning a NetLibrary book is a three step process:

Step 1:

Allow the 7 day lending period to automatically expire **or**, to return the book before the due date:

1. Go to NetLibrary and log-in to your account.
2. Click on *Checked Out Items*.
3. Click on *Check In* next to the item you want to return. You will see a message that says "*The eContent was checked in successfully*".

Step 2:

1. Go to Adobe Reader on your computer and click on the *File* menu. Then click *Digital Editions* and *My Digital Editions*.
2. Find your book and, using your mouse, right-click on the book.
3. Click *Remove*.

Step 3:

1. Go to *My Documents* on your computer and locate the *My Digital Editions* folder (on MACs go to *Documents->eBooks*)
2. Right-click on the eBook you want to delete.
3. Click on *Delete*.

Note: You do not need to complete steps 2 and 3 if you don't want to; however, the unusable eBook file(s) will still be occupying space on your computer. Also, if you ever want to checkout that eBook again, you will not be able to until you delete the old file (you'll get a message saying "circulation expired").

Searching for an eBook in Safari Tech Online

From the Safari homepage you can search for a topic using the Search box and selecting a search field. You may search for your terms in the *Entire Site*, *Title*, *Section Title*, *Code Fragments*, *Author*, *ISBN*, or *Publisher* fields.

You can also browse Safari Tech by category, subject or publisher. Clicking on *View All Titles* gives a list of all Safari eBooks.

Just like NetLibrary, Safari eBooks can be accessed through the library's catalog or through the link to Safari. There are no options to check-out or download Safari eBooks, so they cannot be viewed offline.

Often the print editions of books available on Safari eBooks have accompanying material on CD (practice exercises, etc.) If available in the eBook edition, these materials can be found by clicking on the **Examples** link within the blue bar at the top of the page.

Note: Firewall settings can sometimes cause problems accessing Safari Tech Online. If you have trouble, visit www.etsupp.com/firewalls/ for instructions for configuring firewalls.

California Mission eBooks

The 20 California mission eBook titles can be accessed by searching the public library catalog (see Option 1 above) or through the Homework Help section of the Kids Place (click on **Kids Place>Homework Help>Mission E-Books**). These books do not require a library card to access and they are downloadable. You must have Adobe Reader 6.x or higher. Adobe Reader 7.0 is strongly recommended. You are not *required* to download the mission eBooks. The book will open directly in your browser and can be viewed just like a NetLibrary or Safari eBook. The eBooks will "timeout" if there is no activity for 15 minutes.

If you decide to download a mission eBook, clicking on the large black arrow at the top or bottom right of the cover image begins the process. The time needed to download the eBook will vary depending on your internet connection.

The circulation period for mission eBooks is 48 hours. As with downloadable NetLibrary books, you must delete the files from Adobe Reader, etc., in order to

remove the files from your computer. See the instructions for returning eBooks in the NetLibrary section.

Printing & Copying

There are two methods for printing from NetLibrary depending on whether the file is PDF or non-PDF. For PDF files, use the Acrobat Toolbar at the top of the page to print the page you are viewing. For non-PDF files, follow the procedure below (the Acrobat Toolbar will not appear above non-PDF eBooks):

1. Select the page by LEFT-clicking anywhere on the page you want to print.
2. Click on *File / Print* from the browser menu.

The printout will include only the text from the eBook page selected and will include the entire page. The printout will not match the print preview unless you select the option "Only the selected frame." Follow this same procedure for printing mission eBooks.

To print from Safari, click on *print* on the top of the screen. The section you are currently viewing will print.

Both NetLibrary and Safari severely restrict the amount of text which can be printed.

Troubleshooting Tip; Timeouts: It is normal for eBooks to timeout if your keyboard is inactive for more than 15 minutes. If your eBook is timing out more quickly, clear your *Browsing History, Temporary Internet Files, and Cookies*.
